James-Patrick McCrossan

Backend Python Developer · AI & LLM Engineering · Data

I pair **deep analysis** with **hands-on execution**, using data to build **dashboards, automation and digital products** that people actually use.

Day-to-day I work across **Python, SQL, AI and machine learning**, building **data pipelines** and acting as a focal point for **technology adoption** through clear stakeholder communication, currently on-site in a **secure, highly regulated industry**. At PKF Infuse I led **firm-wide AI adoption**, helping colleagues get real value from it.

I'm marrying my Danish fiancée next year and accommodation in Copenhagen is sorted: 1 month's notice and a work visa is all I need to start.

EXPERIENCE & EDUCATION

Backend Python Developer, Assystem

JAN 2026 – PRESENT

On-site client delivery in a secure, highly regulated environment · limited in what I can disclose

- Built v1 of a major nuclear company's application: FastAPI backend, React frontend, API and database design end to end.
- Built a reinforcement learning physics simulator in Python and TensorFlow.
- Deliver internal Assystem tooling alongside client work; write requirements specs keeping operations and engineering aligned.

Systems & Data Developer, PKF Infuse

JAN – DEC 2025

Accountancy group work, sole developer across systems, data and AI

- Designed, built and server-deployed the firm's resource management application: Flask, React, Nginx, PostgreSQL, with Pandas/NumPy ETL.
- Delivered an AI platform on Azure AI Foundry: prompt chaining and automated workflows.
- Built a Python NLP pipeline on a locally hosted Ollama LLM: full traceability, zero data leakage.
- Built Power BI dashboards over the firm's data for partners and operational teams.
- Led firm-wide AI adoption; trained colleagues on tooling and prompt engineering.

CPD, Microsoft Learn (24 modules, 2025): Implement a responsible generative AI solution in Azure AI Foundry · Fine-tune a language model with Azure AI Foundry · Develop a RAG-based solution with your own data · Evaluate generative AI performance · Secure Azure AI services

MSc Computing, Cardiff University

2023 – 2024

- Dissertation: a machine learning VR kickboxing simulator in Python, TensorFlow, Unity and C#.

Cycled Bilbao to Venice, solo

2023

Earlier: Graduate Landscape Architect, Randall Thorp

2018 – 2023

BA (Hons) Landscape Architecture, University of Gloucestershire

Led landscape design on a multi-million-pound insurance-company headquarters scheme with clients and consultant teams, then retrained into software.

SKILLS

AI & MACHINE LEARNING

LLMs · Azure AI Foundry · Ollama · RAG · NLP · Reinforcement learning · TensorFlow · Prompt engineering

PYTHON & BACKEND

Python · FastAPI · Django · Flask · REST APIs · Nginx

DATA

SQL · PostgreSQL · Pandas · NumPy · ETL pipelines · Power BI · Streamlit · Dashboards

CLOUD & DEVOPS

Azure · AWS · Docker · Terraform · GitHub Actions · CI/CD

ALSO

React · JavaScript · C# · Unity · Testing · Code review

HOW I WORK

Driven · Team-first · Systems thinking · Clear communicator · Eye for detail

LANGUAGES

English, native · Danish, actively learning

REFERENCES

Available on request.

BEYOND WORK

BUILD

Cloud side projects in my own time: **AI-driven automated trading and data systems on AWS**, Python, Terraform and CI/CD end to end.

TEAMWORK

Two-day **Rolls-Royce hackathon** (Project Hack 27), team of six: **agentic RAG assistant** and dashboards with Streamlit and local Ollama. Plus **Brazilian Jiu-Jitsu**: training and competing as a team, week in, week out.

COFFEE'S ON ME, ASK ABOUT

The **ML VR kickboxing simulator** I'm presenting at conference (short paper submitted to **BritCHI**), competing at the **BJJ British Open**, cycling **Bilbao to Venice** (a head start on Danish bike culture), or the **50km ultra-marathon for charity**.
